Chapter-1

Casting Horoscope

An accurate casting of a horoscope enables closer predictions to the actual and this is more so essential in utilising the "Krishnamurthy Paddhati" mode for predictions. In K.P. System the horoscope casting is exactly the same as in traditional system but the house system is different. After calculation of Ascendant and planet positions, the house degrees are calculated as per Placidus system. Further for the planets and houses both, Nakshatra lord and sublord are computed for further analysis of horoscope.

An illustration will revive the methodology to be adopted to ensure accurate casting of horoscopes.

Birth Date: 12- 9-1935.

Birth Time: 9:08 P. M.

Birth Place: GUNA. [M.P.]

Latitude: $24^{\circ} 39' N.$ Longitude: $77^{\circ} 18' E.$

The procedure of casting horoscope includes following main steps :-

FIRST STEP:

CONVERSION OF THE INDIAN STANDARD TIME INTO LOCAL MEAN TIME

The Earth moves in an ellipse round the Sun and revolves once on its axis in 24 hours. It takes 4 minutes to revolve one degree from west to east direction and thereby every solar body appears to move from east to west. Hence in places in the same latitude about one degree east of any place, the Sun rise will be seen 4 minutes earlier than places in the west. Indian Standard Time is always 5 hrs. 30 mts. ahead of Greenwich Mean Time because it is fixed for the longitude 82 deg. 30 mts. E. For the calculation of Local Mean Time it is necessary to note the Geographical Coordinates i.e. the Latitude & Longitude.

Guna is west of the chosen meridian $82^{\circ} 30'$. The diff. of Long is $5^{\circ} 10'$. The time correction @ 4 minutes per deg. will be equal to $5^{\circ} 10' \times 4 = 20$ mts. 40 secs.

So, when it is 9.08 p.m. IST. it means $[09-08] - [0 \text{ hr. } 20 \text{ mts. } 40 \text{ secs.}]$
 $= 8 \text{ hrs. } 47 \text{ mts. } 20 \text{ secs. p.m. LMT. at Guna.}$

Note :- If the locality is in the east of the chosen meridian $82^{\circ} 30' E.$ then the time correction calculated @ 4 minutes per deg. for the difference of longitude of place of birth should be added to the IST in order to obtain LMT for the birth place.

SECOND STEP:

CALCULATION OF SIDEREAL TIME FROM LOCAL MEAN TIME

After having obtained the Local mean time it would be necessary to calculate the sidereal time of the location concerned. The local mean time of 8hr 47 mts 20 seconds at Guna on 12.9.35 has been calculated above with Lat 24°40'N & Long. 77°20'E.

The sidereal time for 12.00 Noon on 12.9.1900 as given in Table of Lahari panchang (enclosed) is $11^h 23^m 14^s$. To this a year correction as given in Table II is to be taken. This for 1935 is $-1^m 53^s$ and correction for time interval of i.e. $1^h 24^m$ needs to be added. Accordingly, the sidereal time is

	hrs	mt	Sec.
1. Sidereal time for 12 Noon on 12.9.1900 as given in Table 1 for 82°30' E for 1900	11	23	14
2. Time correction for 1935th year as for table IV		1	53
	11	21	21
3. Correction to time Interval as given in Table IV	+ 1	1	24
	11	22	45
4. The correction for different East Longitude @ 1 sec per 1½ degree difference i.e. Standard long of 82°30' - 77°40'	+ 0	0	3
	11	22	48
5. Interval between 12 Noon & LMT at Birth	8	47	20
Sidereal Time	20	10	08

THIRD STEP

FINDING OUT THE POSITION OF THE ASCENDANT AND OTHER CUSPS'

Referring to the table of houses in the Lahiri Ephemeris the position of the 10th cusp is given for each sidereal time. For the sidereal time the 10th cusp is given for 20 hr 8' and 20 hrs 12' which is respectively 6° 49' & 7° 47'. For the difference for 4 mts there is 62 sec. difference. Thus for 2' 8" the proportionate increase would be 30' from 6°49' i.e. 7°19'.

From the table of Ascendants for the latitude 24°39' as given in Table the cusp is again given for 20hr 8' and 20 hr 12' as 18°37' and 19°48' respectively i.e. approx 44' for 2 mts 8". The Ascendant would therefore be 18°37' +36'=19°21'. The span between the 10-11th cusp, 11th-12th, 12th - Asc, Asc-1st, 1-2nd and 2nd-3rd cusp are given in

Table. By adding 180° to the above cusps the 7th cusp from there on would be available.

Houses	Rashi	Cusp
1	Aries	19° 21' 0
2	Taurus	18° 14' 0
3	Gemini	12° 39' 0
4	Cancer	7° 19' 0
5	Leo	5° 10' 0
6	Virgo	10° 21' 0
7	Libra	19° 13' 0
8	Scorpio	18° 14' 0
9	Sagittarius	12° 39' 0
10	Capricorn	7° 19' 0
11	Aquarius	5° 19' 0
12	Pisces	10° 21' 0

Cusps of Different Houses

Pisces XII 10-21	Aries Asc. 19-21	Taurus II 18-14	Gemini III 12-39
Aquarius XI 5-10	NIRAYANA RASI		Cancer IV 7-19
Capricorn X 7-19			Leo V 5-10
Sagittarius IX 12-39	Scorpio VIII 18-14	Libra VII 19-21	Virgo VI 10-21

FOURTH STEP:

FINDING THE POSITIONS OF PLANETS AT BIRTH TIME (IST)

Referring to the Lahiri ephemeris where the longitude for planets is given for the year 1935 at 5.30 p.m. IST., the position of the planets can be worked out as follows. The Nirayana position of the Moon has been given for each day while that for other planets are for 7 days. For arriving at the specific hour of 9.08 p.m. the method of log. proportional should be applied. In case of retrograde planet the proportional motion should be deducted from that of the previous day.

Planets	Position on 8-9-1935	Position on 15-9-1935	Motion for one day interval	Proportional Motion	Actual position
Sun	4° 21' 57"	4° 25' 46"	58' 25"	4° 0' 4"	145° 57' 40"
Moon	10° 20' 52"*	11° 6' 12"*	15° 9' 20"	2° 18' 14"	323° 10' 14"
	(* for 24 hrs span)				
Mars	7° 1' 42"	7° 6' 21"	39' 53"	2° 43' 32"	214° 25' 32"
Mercury	5° 14' 32"	5° 23' 50"	1° 18'	5° 29'	170° 11' 00"
Jupiter	6° 25' 14"	6° 26' 20"	9' 24"	37' 42"	205° 51' 42"
Venus (R)	4° 21' 44"	4° 17' 37"	-35' 12"	-2° 28' 48"	139° 15' 12"
Saturn (R)	10° 13' 15"	10° 12' 44"	-4' 26"	-18' 41"	312° 57' 19"
Rahu					267° 53' 00"
Ketu					87° 53' 00"

As birth has taken place 3 hrs. 08 mts. after 5-30 p.m. IST on 12-9-1935 find out the proportional movement for this interval, and add the same to the position of 12-9-1935, if the planet is in direct motion or deduct if the planet is retrograde. As Rahu's position is given in ephemeris, so to fix Ketu's longitudes add 180°.

FIFTH STEP:

POSITION OF FORTUNA (F)

Longitude of Lagna	=	19° 21' 00"
Add Longitude of Moon	=	323° 10' 14"
Sum of Lagna and Moon	=	342° 31' 14"
Deducting Long. of Sun	=	145° 58' 24"
Longitude of Fortuna	=	196° 32' 50"
	=	6° 16' 32" 11" = Libra 16°-32'-11"

SIXTH STEP :

ERECT RASI-CHAKRA AND INSERT THE PLANETS

12	1 Asc. 19-21	2	3 Ketu 27° 53'
11 Sat(R) 12° 57' 19" Moon 23° 10' 14"			4
10	NIRAYANA RASI		5 Sun 25° 57' 40" Venus(R) 19° 15' 12"
9 Rahu 27° 53'	8 Mars 4° 25' 32"	7 Jup 25° 51' 42"	6 Mer 20° 11' 0"

SEVENTH STEP:

CALCULATION OF DASA BALANCE AT BIRTH.

Moon at the time of birth was in $23^{\circ}10'14''$ Aquarius in Poorvabhadrapad star which extends from 20 deg. Aquarius to 3 deg. 20 mts. Pisces. Therefore, the portion to be covered by Moon is $9^{\circ}52'5''$ or 609'. Jupiter has 16 years of Dasha. The Longitude of a star is 13 deg. 20 mts. or 800 mts. Therefore, the balance of Jupiter Dasa at birth.

$$= 609'/800 \times 16$$

$$= 12 \text{ years } 2\text{M } 8 \text{ days.}$$

Exercise

1. Find the LMT for a Birth at 10.40 AM IST at Delhi.
2. Describe the procedure to arrive at the sidereal time for a particular place.
3. Describe the position to find the cusp of the Ascendant & Xth house using the Lahiri panchang and thereafter arriving at the cusps for all houses.
4. How should the accurate locations of the position of planets be done.
5. How should the position of Fortuna be determined.
6. Indicate the constellation & sub lord of the each planet using Table.

Sidereal Time

Table -1

Sidereal Time at 12h noon local mean time for days of year.
(For 82½° E. Longitude and for 1900 A.D.)

* For January and February only. † For March to December.

Table III - Correction for different localities

Place	Long.	Correction	Place	Long.	Correction
		m s			m s
Allahabad	81°52E	+ 0 0	Greenwich	0°0E	+ 0 54
Bangalore	77°36E	+ 0 2	Islamabad	73°10E	+ 0 6
Bangkok	100°30E	- 0 12	Kuala Lampur	101°43E	- 0 13
Bombay	72°50E	+ 0 6	Madras	80°15E	+ 0 1
Calcutta	88°23E	- 0 4	New York	74°0W	+ 1 43
Colombo	79°52E	+ 0 2	Pune	73°53E	+ 0 6
Dacca	90°25E	- 0 5	Rangoon	96°10E	- 0 9
Delhi	77°13E	+ 0 3	Varanasi	83°1E	- 0 0

Correction is @ .66 seconds per degree of longitude from central meridian 82°30' and positive for West and negative for East.

Table IV - Correction to Increase the time Interval

Time	Corr.										
h	m	s	h	m	s	h	m	s	m	m	s
1	+ 0	10	8	+ 1	19	15	+ 2	28	22	+ 3	37
2	0	20	9	1	29	16	2	38	23	3	47
3	0	30	10	1	39	17	2	48	24	+ 3	56
4	0	39	11	1	48	18	2	57	m	m	s
5	0	49	12	1	58	19	3	7	6	+ 0	1
6	0	59	13	2	8	20	3	17	12	0	2
7	+ 1	9	14	+ 2	18	21	+ 3	27	18	+ 0	3
									60	+ 0	10

The time correction is applied for the time interval of the given moment from Noon, increased by the above correction.

Tenth House or M.C. (For all places on the Earth)

Chapter-2

Krishnamurthy Paddhati

2.1. Purpose & Principles

The position of a planet either benefic or malefic covers a large domain of 30° within a Rasi. K.P. system tends to evolve a system by which the operation of a particular planet in a Rasi, is determined by just not its placement but by the constellation it travels and the sub lord it is positioned in.

All planets moving from Vernal Equinox Aries according to the Nirayana system get their results modified as they move in the Zodiac. Thus in the first $13^\circ 20'$ any planet transiting in Mesha will be influenced by the constellation called Aswini and so on till Revathi in which the planet will be influenced by Mercury. As the duration of the zone $13^\circ 20'$ for each Nakshatra is a broad zone, they are further classed into nine parts in proportion to their duration as per their Vimshotri Dasa. This is termed as the sub-lord.

Normally, Jupiter, Venus, affiliated Mercury and waxing Moon are termed as natural benefics while Sun, Mars, Saturn, Rahu & Ketu as malefics. But in KP it is determined by sub lord planet is posited in.

2.2 Computation of Sub-Lords

The Aswani nakshatra under the constellation lord Ketu has $13^\circ 20'$ duration. This is divided into 9 parts, for each planet starting from Ketu, in proportion to their Vimshottari Dasa duration we get the period of the sub lords under the constellation Ketu. Thus Ketu has 7 years off 120 years duration in the Vimshottari Dasa duration and therefore Ketu sub in Ketu occupies 7 parts out of 120 of the total span of Nakshatra of $13^\circ 20'$ or 800'.

Thus Ket- Ket = $\frac{800 \times 7}{120} = 46 \frac{2}{3}'$ i.e. $46' 40''$ in Aswini

and for Venus sub in Ket $\frac{800 \times 20}{120} = 133 \frac{1}{3}' = 2^\circ 13' 20''$

Thus Venus sub lord will extend from $46' 40''$ to $3^\circ 00' 00''$ in Aries.

Sub Lord	From DMS	To DMS
1. Ketu	0	0.46.40
2. Venus	0.46.40	3.00.00
3. Sun	3.0.0	3.40.00
4. Moon	3.40.0	4.46.40
5. Mars	4.46.40	5.33.20
6. Rahu	5.33.20	7.33.20
7. Jupiter	7.33.20	9.20.00
8. Saturn	9.20.00	11.26.40
9. Mercury	11.26.40	13.20.00

A table for ready reference is given at the end of the chapter from which the Rasi lord, star lord and sub lord could easily be ascertained. The position of planets, cuspal position of the various bhaves and their constellations and sub-Lords worked out as above for the horoscope cast in chapter-1 in respect of birth at 9.08 p.m. at Guna is giving below:

POSITION OF THE PLANETS AND THEIR CONDITIONS:

Planets	S- D -M-S	Constellation	Cons. Lord	Sub Lord
Sun	04 ^s 00°01'08"	P-phalguni	Venus	Kethu
Moon	10 ^s 23°10'14"	P-bhadrapad	Jupiter	Saturn
Mars	07 ^s 04°25'32"	Anuradha	Saturn	Saturn
Mercury	05 ^s 20°11'00"	Hastha	Moon	Kethu
Jupiter	06 ^s 25°51'42"	Vishakha	Jupiter	Kethu
Venus	04 ^s 19°15'12"	P-phalguni	Venus	Rahu
Saturn	10 ^s 12°57'19"	Shatbhisha	Rahu	Saturn
Rahu	08 ^s 27°53'00"	Poorvashada	Venus	Kethu
Kethu	02 ^s 27°53'00"	Punarvasu	Jupiter	Kethu

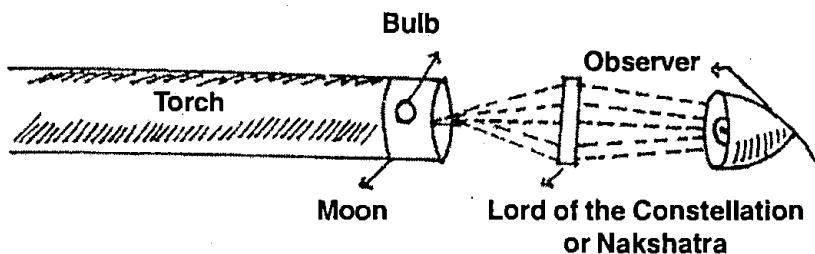

CUSPAL POSITIONS OF TWELVE BHAVAS :

Bhava	S-D-M	Cusp Sign Lord	Constellation Lord	Sub Lord
I	0-19-21	Mars	Venus	Rahu
II	1-18-14	Venus	Moon	Mercury
III	2-12-39	Mercury	Rahu	Mercury
IV	3- 7-19	Moon	Saturn	Mercury
V	4- 5-10	Sun	Kethu	Mars
VI	5-10-0	Mercury	Moon	Moon
VII	6-19-13	Venus	Rahu	Mars
VIII	7-18-14	Mars	Mercury	Mercury
IX	8-12-34	Jupiter	Kethu	Mercury
X	9- 7-19	Saturn	Sun	Kethu
XI	10- 5-10'	Saturn	Mars	Sun
XII	11-10-21	Jupiter	Saturn	Sun

2.3 Role of Planets, Rashi & Constellations:

Suppose (a) there is a light in the centre of a circular room provided with 12 glass panes of different colours (b) around the room there is a verandah and outside it, there are 27 glass panes of which the colour, 1, 10 and 19, is the same; 2, 11 and 20 differ from 1, 10, 19 but these three are of the same colour; 3, 12 and 21; differ from others but these three of the same colour as they belong to one group. Similarly, all the 27 panes are of 9 different colours.

If a person walks outside the circular verandah looking at the light inside, he will find the colour of the light getting changed according to the colour of the coloured panes. Similarly, the results of the planets are modified by the lord of the sign and indicated by the lord of the Nakshathra or constellation.

If a planet is compared to a torch light then the influence of the sign and the influence of the Zones of $13^{\circ}.20'$ called stars, change the colour of the light. Suppose a railway guard shows the light, It may be plain or green or red according to the background mirror.

Similarly, imagine that the mirror used behind the bulb is the lord of the sign. It may be clear and it may illuminate to a maximum or it may be dull rendering the light, weak. The strength and modification of the colour depends, on the mirror behind the bulb (which is the reflector) which denotes whether a planet is exalted and strong or debilitated and weak.

Also suppose one coloured slide is inserted between the torch light and the observer this colour depends on the lord of the constellation "C" when 'p' is the planet (which is the bulb).

Therefore, the results of a planet in different positions in the Zodiac, in different signs and different constellations, is similar to the light from the torch getting modified and the resultant becoming absolutely different from the original light unless all the colours are similar to that of the planet.

Prof. Krishnamurti found out that a planet does not invariably give the matters of the houses it occupies or owns but offers to give matters of such planet in whose constellation it is deposited. He used the same 9 planets, the same 27 constellations, and the 12 Rasis together with the same old Vimshottari Dasa system, and said that a house occupied by the constellation lord and also the houses owned by that planet.

The occupant of the house will move the matters of the house it occupies, apart from the results it has to offer due to its constellational position if there is no planet in any of its constellations.

Whether or not, such results as are indicated by the tenant planet will come to pass depending upon the 'SUB' portion of the constellation occupied by the tenant planet.

And if the lord of the 'SUB' occupied by the tenant planet is favourably connected by occupation, lordship to the matters signified by the constellation lord of the tenant planet, the tenant planet fructifies the matters of which it is the signifier due to its constellation position.

If the tenant planet is placed in the 'SUB' of a planet who occupies or owns houses detrimental to the affairs of the constellation lord, the matter is not fulfilled.

The 'SUB' lord should not be in unfavourable aspect to the CUSP of the house signified by the constellation lord. The Aspects are to be computed by reckoning the distance in terms of the longitude.

If the constellation is akin to Dasa, the Bukthi is akin to 'SUB', the Anthra is akin to SUB-SUB, and so on.

A planet in the Padhdhati terminology becomes a maletic or benefic, not in consideration of its nature in terms of the old traditional system, but by reason of its owning benefic or malefic houses or occupying such houses.

Prof. K.S.K. was emphatic in saying that no planet is wholly a benefic nor in full a malefic. Neither Jupiter is benefic nor Saturn is malefic.

Advantageous houses : I, II, III, VI, X, XI

Disadvantageous houses : IV, V, VII, VIII, IX, XII

Just as a planet is governed by the sub lord, so also the cusps of houses are governed by the sub lords in accordance with the degree rising on the cusp of the Houses. The degree of effects depends on the sub-lord of the Cusp : not only it should be the signifier of the Bhava where the cusp falls but also it should be the signifier of any of the houses of the matter concerned. Sri K.S.K. emphasised that judgement of each bhava-cusps is essential.

Prof. K.S.K. had advocated the house divisions under Placidus system in constructing a birth chart or Horary chart.

K.P. System emphasis that as the ascendant and the cusp of each house move faster than the planets, it is these that explain rapid changes due to the occupation of the star and sub. The ascendant can move in a sign for about two hrs but in a constellation, it can only be for about 50 to 60 mts. As certain events can happen within 5 to 10 mts, sub lord becomes important. It would be wise to draw out the sign lord, star lord and sub lord for all the cusps and the ascendent for better understanding of the horoscope.

Coming to the analytical part which is of supreme importance with such a large data base we could narrow it down to the following in the order of importance.

1. The planet in a constellation will offer the result of Bhava house occupied by the lord of the constellation.
2. The planet which is situated in a constellation is the strongest to offer the results of the house occupied by the lord of the constellation..
3. The occupants of a house is strong to give the results of the house occupied by it. Planets in the constellation of the occupants of a Bhava will indicate the fruits of the Bhava.
4. Planet deposited in the constellation of the lord of the sign where the cusp of a house falls.
5. Then only the lord of the sign where the cusp of a house falls.

The above form the various signifiers for the determination of a particular event. Only the conjoined planets of the above should be utilised for determining the end result.

Hence it may be concluded that the planet is the resource, constellation indicates nature of the result and the sub is a deciding factor whether the matter is favourable or not. Unless the last is favourable we do not call it a benefic.

Note:- Rahu & Kethu are Nodes. A node signifies firstly the results of the planet or planets with which it is conjoined, then the results of lord of the constellation in which it is deposited, then the planet or planets aspecting it and lastly of the owner of the sign in which it is deposited.

HOUSE SIGNIFICATORS

House	Planets in the Const of the Occupants	Occupants of the Bhava	Planets in the Const. of the Cusp sign lord	Sign Lord of Cusp
I	-	-	-	Mars
II	-	-	Venus, Sun, Rahu	Venus

Exercise

1. How do you arrive at No. 249 in K.P.
2. What is Sub-Lord. Calculate Sub-Lord for a planet with degreee $2^{\circ} 5' 6''$.
3. What is the role of signicator in K.P. When is planet strong signicator.
4. What are the ruling planets. What is the use of ruling planets.
5. Write Rashi Lord, Nakshtra Lord and Sub-Lord for seed No. 142.
6. What is the role of sub-lord in K.P.
7. Why 249 No. system was evolved.

Chapter-3

Ruling Planets

3.1 Ruling planet

The ultimate aim after assessing the matters of a house is to determine the time of fructification. In assisting to arrive at this correct time of fructification K.P. evolved the system of ruling planets. These are used to fix the time and date of realisation without resorting to Horary or Natal charts.

These Ruling planets are :-

1. Lord of week day
2. Lord of Moon sign
3. Lord of Moon constellation
4. Lord of Lagna
5. Lord of Lagna constellation
6. Nodes tenanting the signs of Ruling planets.

Nodes, if they signify the sign position of a ruling planet should be included as a Ruling planet. While analysing the ruling planets, the following should be kept in view:-

1. Strength of ruling planet is in order of star lord of Ascendant, lord of the ascendant, star lord of the Nakshatra (Moon), Lord of the Rasi and then the lord of the day.
2. Even though ruling planets are selected in the order given in Para 1 , if a ruling planet were to be in the sub of another who is detrimental to the houses to be judge for particular matter - by being the signifactor for 8 & 12 to the house to be judged, then this will not be a fruitful ruling planet.
3. If Ruling planet selected, were to be in a sub of a planet which is retrograde it is not useful.
4. A ruling planet fails to offer results only when it is in a sub of the lord which is retrograde.

3.1.1 Example :

The query was whether the orginal Horoscope cast was correct. The query was at 11 p.m I.S.T. on 4-2- 1976 at $8^{\circ}29'N/76^{\circ}59'E$

Orginal Chart

Birth 4.25 a.m I.S.T. at Trivandrum on 15-12-1967

Sani	Rahu	Moon	
	RASI CHART		
Kuja			Guru
	Sun Budha	Sukra Ketu	Lagna

The rashī chart for the moment of judgement was casted and was as below:

Rasi Chart for the moment of Judgement

Moon Guru	Kethu	Kuja	
	RASI CHART		Sani (R)
Sun			
Budha Sukra		Lagna Rahu	

Ruling Planets :

4-2-1976 Wednesday. Time 11 p.m. I.S.T.

Place 8°-29'N/76°-59'E

Wednesday	Budha
Ascendant Rasi 3°-16' Thulam	Sukra
Ascendant Star Chitra	Kuja
Moon Rasi Pisces	Guru
Moon star	Sani

Kuja aspects Budha and Sukra. Guru is conjunction with Moon. So Kuja can act for Sukra and Budha, and Moon can act for Guru.

When the Ascendant is calculated for 4-25 a.m. I.S.T., at Trivandrum on 15-12-1967 it comes to $0^{\circ}8'$ in Scorpio. Since Mars is the star lord of Ascendant, it is the most powerful of the ruling planets, so the Ascendant of the native must be Scorpio rasi only. By applying the theory of Ruling Planets, we can get the ascendant position as Mars Rasi, Guru star, Moon sub and Mars sub sub. So the Ascendant arrived at by casting for the time is correct. Kanya Lagna given in the orginal horoscope is wrong and the following is the correct horoscope of the native.

Sani	Rahu	Moon	
	RASI CHART		
Kuja			Guru
	Lagna Sun Budha	Venus Kethu	

Birth star Krittika,

Balance of Rasi Dasa at birth time : 1Y-6M-18 Days.

3.1.2 Example : When will wife return :-

Query details :

Place	Bangalore
Latitude	$12^{\circ}58'$ North
Longitude	$77^{\circ}36'$ East
Date	2nd April 1972
Time	9-23 a.m. (I.S.T.)

Ruling Planets :

The Ascendant lagna rising at the time of judgment was noted to be Taurus $10^{\circ}09'$ (Nirayana system).

Lord of the day	Sun
Lord of the rasi transited by the Moon	Sukra (Libra)
Lord of the constellation transited by the Moon	Guru (Visakam)
Lord of the sign on the Ascendant	Sukra (Rishaba)
Lord of the constellation rising on the Ascendant	Chandra (Rohini)

The ruling planets were Chandra, Sukra, Guru and Surya. Although Surya was transiting in the constellation of retrograde Budha and was conjoined with Budha, Yet as the matter has to materialise in a short time, Surya was not rejected.

When the Ascendant moves in Rishaba owned by Sukra, in Chandra's Constellation Rohini and to the sub of Guru and sub-sub of Surya. i.e. between $15^{\circ}3'34''$ and $15^{\circ}8'34''$ in Rishaba, she should arrive. So the time of arrival should be 9 hours 23 minutes 28 secs. a.m. Local Mean Time. Adding 19 minutes 36 secs. being the difference in the local mean time between Bangalore Meridian and the Indian Standard Time Meridian, the arrival time was calculated to be 9-43 a.m. (I.S.T.). She did knock at the door at 9-43 a.m. (I.S.T.) exactly as surmised by the application of Krishnamurti Padhdhati.

Chapter-4

Significant Points for K.P. Analysis

4.1. Aspects and Significance

All planets have a seventh aspect while Saturn's 3rd & 10th, Jupiter's 5th & 9th and Mars 4th & 8th have a stronger aspect than even their 7th aspect. However, these aspects cover a wide range of 30° in a house and would mislead one into improper interpretation. To arrive at proper aspects mentioned, it would be necessary to work out the distance between the two longitudes of the planets concerned. Thus if Mars is in Kanya 1st degree and Kethu in 29th degree in Dhanus then they show beneficial results as they are at a distance of 118 degrees which is within the range of the trine aspect. It is thus observed that the same two planets though posited in the same house would have different aspects. They may be benefic or otherwise malefic, depending on the actual longitudinal distance between the two.

No planets aspect the 2nd, the 11th and 6th houses subject to what is mentioned above.

It may therefore be concluded that if two planets form favourable aspects then both of them will cooperate and offer such results which the lord of the dasa and the planet indicate e.g. if the lord of the Dasa promises agreeable results, then planets forming harmonious aspect will assist the dasa lord to offer desirable results. On the contrary if a planet forms adverse aspects then it will not cooperate with the dasa lord.

The various aspects normally applied are given below :

Aspects	Position	Remarks
1. Conjunction	0° Apart	Very favourable and strong
3. Opposition	180° "	Adverse in nature, indicative of tension if planets are malefic by nature or lordship
4. Trine	120° "	Powerful for good, benign by nature.
5. Square	90° "	Evil
6. Sextile	60° "	Similar to trine

7. Semi square	45° "	Moderately evil
8. Semi Sextile	30° "	Slightly good.
9. Quincunx	150° "	Adverse
10. Quintile	72° "	Good
11. Biquintile	144° "	As good as trine
12. Sesquiquadrate	135° "	Similar to 45° aspects.
13. Vigintile	18° "	Slightly favourable
14. Quindecile	24° "	Slightly good
15. Decil Semiquintile	36° "	Moderately good
16. Tredecile	108° "	Favourable
17 -	54° "	Slightly good
18 -	162° "	Slightly good

All aspects of multiple of $22\frac{1}{2}^{\circ}$ are evil and of 18° and 30° beneficial except 90° & 150° . The conjunction is most powerful followed by opposition, trine, quincunx, biquintile, sesquiquadrate, square sextile and quintile. The rest are moderate in affect.

Orb : The distance during which a planet has an influence over another while approaching it and till the distance its effect prevails while receding from it is known as an orb. The orbs allowed to the Sun, Moon and other planets are :

	Applying	Separating
Sun	12°	17°
Moon	8°	12°
Other planets	6°	8°

It is to note that only faster moving planets will apply over a slow moving planet, overtake it and then recede.

The order of fast moving planets are Moon, Mercury, Venus, Sun, Mars, Jupiter, Saturn, Uranus and Neptune. It may sometimes be seen that the motion of Venus is faster than that of Mercury. Mercury when near the Sun moves faster than Venus than when it is in a aphelion position. A table of the different aspects and their range of influence is given below :

Major aspects	Applying	Exact	Separating
(1) Opposition	172-180	180	180-188
(2) Trine	114-120	120	120-126

(3) 126 degrees	—	126	126-130
(4) Square	84-90	90	90- 96
(5) Sextile	54- 60	60	60 -66
(6) Biquintile	141-144	144	144-147
(7) Quincunx	148-150	150	150-153
(8) Sesquiquadrate	132-135	135	135-138
(9) Tredecile	106- 108	108	108- 110
(10) 54 degrees	52-54	54	54- 56
(11) Semi-square	43- 45	45	45- 47
(12) Decile	34-36	36	36- 38
(13) Semi-sextile	28 -30	30	30- 32
(14) Vigintile	16- 18	18	18- 20

4.2 Mutual Application : When two planets are in an aspect and one of them is retrograde, the other moves towards it at a faster rate. This is known as Mutual Application. Retrogradation is an appearance caused by the combined motions of a planet and the earth and their relative to Sun. No planet retraces in its orbit. If a planets longitude goes on decreasing then it is said to be in retrograde motion . Sun & Moon are never retrograde while Rahu & Ketu are forever retrograde.

4.3 Retrogression : There are different versions to what effect a retrograde motion would give a few of which are :

1. Westerners feel when benefic planets are in retrograde they weaken their beneficial results while a malefic planet in such a position improves the evil double fold. When two planets which are retrograde are in good aspect, the results indicated by the aspect would be deficient and disappointing. An evil aspect of a retrograding planet accentuates evil effects.
2. Hindu mythology states a planet conjoined with a retrograde planet gets increased strength. An exalted planet in retrograde attains neecha value while a debilitated planet attains exaltation. A retrograde planet possesses strength even in its depression or inimical sign or amsa.

In Natal charts retrogression has no importance. However in Horary horoscope, the following results accrue as per KP :

1. A retrograde planet in the constellation of a planet which is in direct motion, indicates matter will materialize after obstacle and delay, when it is indirect motion and passes beyond the point wherefrom retrograde motion started.
2. A planet in retrogression in the constellation of another retrograde planet or in its own, promises only failure.
3. A planet in direct motion, in the constellation of a retrograde planet, one cannot

have success (Rahu & Ketu should not be taken as retrograde for this purpose of analysis.)

4.4 Combustion of Light : Planets within a distance of 5° from the Sun are in combustion (totally eclipsed). However, if they are 10° away from the Sun, the combustion is moderate while beyond 15° there is no combustion.

It may be mentioned, that if two planets may not be having a direct aspect between themselves but could be having a link planet which produces the aspect. Thus if Mars in Rishabha 5° and Jupiter in Vrischika 17° they are not in opposition as Jupiter 4° falls beyond 13° of Vrichika upto which the orb of opposition extends. If however, if Moon is in 11° Sinha it will be square to both Mars & Jupiter (after allowing the orb for square aspect) It will then transmute the influence of the malefic Mars towards the benefic Jupiter.

Moon, situated in between them has brought about opposition aspect between Mars and Jupiter though it did not prevail earlier.

4.5 Exaltation & Debilitation

In K.P. if a planet is exalted, but is in a constellation of a debilitated planet, its ability to do good or bad is limited. However, if a planet is in debilitation and is running in the constellation of an exalted planet it magnifies its abilities manifold.

4.6 ECLIPSE-ECLIPSED PLANET-RESULTS

If any heavenly body intercepts the light of another heavenly body and the onlooker is unable to see the farther off planet it is said to be eclipsed. The nearer planet deprives the light of the more distant planet. Its brilliance, the circular shape and splendour will be lost.

In the Solar system, Sun is taken as the Central body around which the planets move round and round. Each planet has its own orbit- its own pathway round the Sun. But the earth and the Moon go round the Sun, together. The one feature of Moon which is about 2,40,000 miles away from the earth goes round the earth once in 27.5 days and both Moon and earth go round the Sun once a year.

Mercury and Venus are very near Sun. Sun is 93 million miles away from the earth. Mercury is 36 millions miles away from Sun ; Venus is 67 million miles away from the Sun.

Therefore, there will be occasions when Moon, Mercury and Venus can come between the earth and the Sun.

Suppose you keep one of your fingers near either of your eyes. Close the other eye. One elephant standing 100 meters, away is hidden by this small finger. This depends on the size of the finger, its nearness to the eye and the farther distance of the elephant. Now, your eye, the finger and the elephant are in the same line and plane. Suppose,

the elephant is lifted by a lift, in the same place. Even though the elephant was hidden by the finger previously, as it is lifted up above the area covered by the finger, then the elephant becomes visible, slowly and steadily.

Thus Moon is a decently big body. It is very near to the earth. The Sun is very far off. It is very big like the elephant compared with finger. So, when the Moon comes in between the observer and the Sun, the Sun is not visible. Slowly the shadow of the Moon, covers the Sun. This is called the Solar eclipse. During the duration of the eclipse the declination of the Moon and Sun will be the same. But if the declination is different, but the celestial longitude of both is the same then it is only New Moon. Similarly, when earth comes between Moon and Sun, earth prevents Moon from getting the light of the Sun, and lunar eclipse is formed.

Just like, during Solar eclipse, Sun loss its brilliance and is hidden by Moon and during lunar eclipse Moon loses its pleasant light and is hidden by the earth, so also the rays of other planets are interrupted. Because, we, on the earth, do not receive very bright light, illuminating the objects on the earth, from other planets, we cannot see, notice and realise the eclipse of the other planets.

The planets Mercury and Venus are called Inferior planets as they are nearer to Sun than the earth and they can be between the Sun and the Earth, just like Moon during New Moon days and Solar eclipse days. Moon is hidden from Sun by the earth during lunar eclipse. But earth can never come in between Mercury and Sun or in between Venus and Sun. So Earth can never eclipse Mercury or Venus.

4.6.1 What eclipsed planet can do in its period or sub-period: (as per KP)

Let us consider the results of the planets situated in the constellation of those which are eclipsed and what they signify. If a planet is deposited in the constellation of an eclipsed one and if it is the sub-lord of the lagna cusp, the sub lord shows that the native will be imprisoned; he will lead the life incognito; will suffer from fear, disease and anxiety, will participate in funeral rites; incur loss and may lose position too, will be unfortunate, etc. .

Sub lord of 2nd cusp: Behaves stupidly in a public assembly, will be untrustworthy, will receive annoying letters, write bad ones or anonymous ones suffer from eye troubles, will be foul-tongued, spend heavily, incur royal displeasure.

Sub lord of 3rd cusp: Demise of brother, evil advice, trouble through secret mechanisation of internal enemies, humiliation, discomfitures and loss of pride thereby.

Sub lord of 4th cusp: Distress to mother, sickness to dear friends, danger to building, trouble due to the loss of cattle, danger from water and conveyance.

Sub lord of 5th cusp: Loss of a child, aberration of the mind, deception, wearisome, wandering, trouble in the stomach displeasure of the Government and bodily weakness.

Sub lord of 6th cusp: Will have troubles through thieves, will suffer reverse, defeat, will commit wicked acts, will do servile duties, will be despised, scandalised and injured.

Sub lord of 7th cusp: Distress to son-in-law, separation from beloved, untoward results due to the troubles from the Opposite sex, intrigues with wicked women, diseases in the private parts, ever wandering.

Sub lord of 8th cusp :-Excessive sorrow: want of sense, carnal appetite, jealousy, unconsciousness, poverty, fruitless rambling, sickness, humiliation and death.

Sub lord or 9th cusp :— Will incur the wrath of the deity or Guru or preceptor or father suffer something untoward, trouble to wife and children, will do wicked acts, elder's demise, will suffer from poverty.

Sub lord of 10th cusp: Fruitless attempts, loss of honour, will become wicked, leaves his permanent place, inauspicious happenings, will lead bad life, suffer troubles.

Sub lord of 11th cusp: Bad news, trouble to elder brother, sickness to children, will suffer misery, deception and ear disease.

Sub lord of 12th cusp: Various diseases, dishonour, disappearance of wealth, detention, bondage.

These results will be experienced by a person when he runs the dasa, bhukti or anthra of the sub lord as mentioned above.

4.7 Principles of Judgement

Aspects are the modifying influences in horoscope and a prediction is never complete unless the aspects are properly computed, studied, and the results judged. Actually, the diametrically opposite results enjoyed by the twins can be scientifically explained by the aspect between the cusp and the signifier.

A few useful hints are given below to enable one to arrive at a correct judgment.

- (1) First assess the strength of the aspect. Decile or 36 degrees aspect is not so powerful for good as a trine or 120 degrees aspect; not semi-square or 45 degrees aspect is so harmful as square or 90 degrees.
- (2) What is the quality of the aspect? Is it a beneficial aspect or an evil one?
- (3) Is the aspect exact (rapt, partile) or is it wide (platic)?

If platic, note whether the aspect is in the process of formation or dissolution.

- (4) Note the affairs governed by the house occupied by the aspected planet. Is it conjoined with any other planet at the same time? Association with a benefic (lord of a beneficial house in the chart) is very good and auspicious. Any connection with malefics, more especially with lord of 6 or 8 or 12 either by being conjoined with them or occupying their nakshatras, etc. portends evil. The nakshatra occupied

by a planet is the most important as the results denoted by the nakshatra lord (by its ownership) will mostly predominate.

(5) What does the aspected planet denote by his lordship? Is he a benefic or not? No doubt a planet possesses certain natural characteristics and these results will operate, but what the planet has to give by lordship will even change the results indicated by its nature e.g... Jupiter, a benefic by nature will be evil by owning evil houses. Saturn by owning favourable houses becomes a benefic. Even these results are modified and changed by the occupation of various houses in the chart. The correct way is to Judge by taking the planet's occupation, lordship of houses and its nature. Occupation in a particular constellation and the modification by the lord of the constellation are still more important. Jupiter and Venus who are natural benefics prove to be the worst evils for a number of people and the natural malefics, Mars and Saturn, immensely benefit some, as they occupy the constellation of the planets owning and occupying good houses.

(6) Is the aspected planet placed in house which is 6 or 8 or 12 to the one it owns? Find out whether it is in a good angle (aspect) to the cusp of the house of which it is the owner. Suppose a person is born when the 29th degree of Aries (Mesha) was rising in the East. Then Mars rules the first house. If Mars happens to occupy Kanya (Virgo) 2nd degree, according to the Hindu method. Mars would be considered as being in 6th to the lagna and therefore badly placed. Actually, however, Mars is at a distance of 123° from the Ascendant and so it is in good trine aspect. (7) Is the aspected planet dignified? A planet in its exaltation sign is the strongest. Next is the one in a Vargottamma position, i.e., occupying the same sign both in the rasi and in the navamsa chart. The third is the one in its Moolathrikona house. The fourth, the one in its swakshetra (own house) and the fifth is the planet which is in its friend's quarters. A planet in debilitation or in enemy's camp or connected with malefics in any manner, is said to be weakly posited and afflicted.

(8) Then note the nature of the sign occupied by the aspected planet. Is it a movable (chara) sign, or fixed (sthira) sign or common, (ubhaya) sign? Is the sign fiery, earthy, airy or watery, positive or negative, fruitful or barren, etc.

Similarly, find out whether the aspecting planet is a benefic by lordship, whether he is dignified or afflicted, beneficial or adverse by occupation and whether it aspects from a sign congenial to its nature. Also whether the aspecting planet in a kendra (angular) panaphara (succeedent) or apoklima (cadent) house. Houses 1, 4, 7 and 10 are termed kendra houses and planets herein are said to be accidentally dignified, i.e., they attain full strength to express themselves. Planets in 2, 5, 8 and 11 called succeedent (panaphara) houses gain moderate strength. The houses 3, 6, 9 and 12 are called

cadent (apoklima) and planets in these houses get weakened and lack opportunity for expression. It is also important to note who is the lord of the constellation in which aspecting planet is situated.

If one has correctly assimilated the basic elements constituting a horoscope and has acquired the ability to analyse properly, the value of this method to predict the nature of event and the time of the event.

Exercise

1. Define in short the advantages of using the Krishnamurthi Padathi system for analysis of an horoscope.
2. State the order of importance for arriving at the conclusion as to which planets are the main significators for a particular event.
3. Why should the longitudinal difference between planets be taken for arriving its aspects. State with example.
4. Give the various aspects and their significance.
5. What are effect of retrograde planets?
6. How does exalted & debilitated planets effect the strength of a planet?
7. Mention the effect of an eclipsed planet during its period or sub period as per K.P.

Chapter-5

Krishnamurthy Paddhati Applied to Natal Horoscopes

5.1 While applying Krishnamurthi Padhathi to Natal Horoscopes it is necessary that one should be aware of the significance of each houses. It may be mentioned that while analysing a Natal Horoscope retrograde motion is of no consequence.

The constellation ruled by a planet indicates the matters signified by the bhava occupied and owned by it.

The sub-lord occupied by a planet denotes whether it is auspicious for the progress of that bhava or inauspicious so that one meets with obstacle or faces dis-appointment or negation of the matter.

This applies to all bhava results. If lagna is occupied by a planet or owned by one and if a planet either the same lagnadhipathi or any other planet is deposited in the occupant's or owner's star, then they indicate first house matters. If the depositor in that constellation is in the favourable sub, matters indicated by lagna will thrive. If the depositor in that constellation is in an unfavourable sub, the matter indicated by the lord of the constellation as per its occupation or ownership will suffer : must suffer.

Accordingly systematic analysis by the K.P. mode requires the following:

1. Cast the Horoscope with planets and their Degrees
2. Define the cusps of the 12 Bhavas.
3. Ascertain the Bhavas for the query under consideration.
4. Determine the signifacors for the Bhavas concerned as enunciated in Chapter-2 i.e.
 - a) Bhava Lord, Its constellation and Sub-Lord
 - b) The planets in the constellation of the occupants of the Bhava
 - c) The planets signifying the particular Bhavas under consideration
 - d) Determine the effect of the different aspects upon the Bhava as well as on the signifacors concerned. This will include whether the aspecting planet is in benefic or malefic longitudinal difference, whethers it is in retrogression etc. as enunciated in Chapter-4.
5. Having obtained the signifacors, ascertain the conjoined signifacors that will operate the particulars Bhava under consideration.

6. Finally determine the Dasa, Bhukthi and Anthara when the signifactors will conjointly operate.

5.1.1 Example :

Let us take the following chart :-

Kethu Dasa balance 0 yrs 5 months 23 days.

Lord of lagna is Sun: no planet is in lagna. Sun's stars are Karthik, Uthrapalguni and Uthrashada. Planets, if deposited in these stars will refer the matters signified by the first house. If there is no planet, Sun gives lagna bhava results. This is similar to a Secretary who has 3 Deputy Secretaries & are given 3 rooms to carry out the instructions of the Secretary. If all 3 rooms are vacant, if no deputy is found, Secretary does the job. Even when they are there, Secretary can do other than what the Deputies do.

Jup. 8-27	IX 0-30 Moon 12-25	X 1-30 Rahu 23-23	XI 1-30
VIII 28-30 VII 8-04	29-1-1928		XII 4-45
Mer. 29-27 Sun 15-40 VI 0-30	7-06 P.M. 13-04 N 80-15 E		Asc 0-04 II 28-30
Mar 14-59 Ven 7-53 V 1-30	Sat 23-37 Ket 23-23 VI 1-30	III 0-30	

There is no planet in Sun's star. Hence Sun gives lagna results. Sun is in Moon's star. Moon is in 9 and owns 12. Hence Sun mostly refers to the matters signified by 9 and 12, i.e., long journey; staying outside; loss of father; permanent possession of father, separation from father. 3.1.1 judge the death of his father.

Note the sub occupied by Sun. It is in Jupiter's sub. What can Jupiter do to the 9th house. What can Jupiter do to the 12th house?

Jupiter is in Saturn star. As Saturn is the Bhadhakasthana Adhipathi to 9, Jupiter indicates Bhadhaka to father. Therefore, if a constellation indicates father, then the sub of Jupiter in that constellation indicates danger to the father.

Therefore Sun in the constellation of Moon in 9 and sub of Jupiter-the Bhadhaka to father, promises danger to father.

9th house is owned by Mars. It governs Mrigasira, Chitra and Dhanishta stars. Rahu and Mercury are in Mars star Rahu is in the sub of Mars who denotes longevity to father. Mercury is in the sub of Saturn, Bhadhaka to father. Hence Rahu is a benefic whereas Mercury is evil.

To the longevity of father houses 2 and 3 counted from 9th is evil. Both are owned by Venus. Rahu occupies 2 to 9; Mars occupies Venus star; none in Rahu star. Mars is in the sub of Venus. So it is harmful; Rahu is in the sub of Mars. It is good.

Therefore Sun, Mercury and Mars are evil. Venus is in Jupiter sub. Venus is also evil.

(Venus is in the constellation of Kethu who represents 4th and 9th houses. Therefore Venus indicates the houses 9, 10 and 3 danger to father)

His father died during Sun Dasa, Mercury Bhukti Venus Anthra in July 1952.

5.1.2 Let us judge 4th house. It is occupied by Sani and Kethu. It is owned by Mars. So planets in Saturn's stars, Kethu stars and Mars stars are those which refer 4th house matters.

Venus in Kethu star, Jupiter in Saturn star, Mercury in!

Mars star indicate 4th house matters.

Venus is in the sub of Jupiter, Marakasthana adhipathi and Venus is in Marakasthana to 4.

Jupiter is in Venus sub. It is evil. Mercury is in Saturn sub. As Saturn is in rapt conjunction with Kethu and Saturn is in the constellation of the 8th from 4th, Mercury is evil; Saturn is also evil.

Now Venus, Mercury, Mars, Saturn, Moon, etc. refer 4th house matters. It is the lord of the sub which indicates whether 4th house matter will thrive or not.

Venus in 2 in the sub of lord of 2.

Mercury in the constellation of planet in 2 to 4, owner of 4 and in sub of evil in 4.

Saturn in the sub of Jupiter and Kethu in the sub of Jupiter, both occupying 4th house are evil. Hence he lost his mother during Venus Dasa Mercury Bhukti Saturn Anthra on 27-4-47.

Venus in the fifth house, i.e., the second to the 4th house by occupation and it refers the fourth house being the owner of the 4th.

Hence Mars indicates about health and causes of death during the period of the planet in the star, if any, and which is in the sub of one referring the 4th or 5th or 10th (5th and 10th are Maraka houses to the 4th). Mercury is in Mars star and sub of Sani who signifies the 4th.

Let us find out the date of the death of his mother. It was on 27.4.47 when Venus Dasa (in the constellation of occupant of 4 and sub of the occupant of 10) Mercury Bhukti (constellation of planet in 2 to 4 and sub of planet in 4) and anthra of Saturn which refers the 4th house to give life or cause death depending on the sub which Saturn occupied) and it is in the sub of Mars and Shookshma of Rahu in 10 which is also in the constellation of Mars in 2 to 4 and sub of Mars.

Day of demise-Friday. Star Moolam where Dasanatha was. (Jupiter rasi-Jupiter signifier of 4 in Saturn star and sub of Venus in 2 to 4) at night which lagna was in poorvashada 15° in Dhanus.

5.1.3 Death of child: Happened during Moon Dasa Jupiter bukti Rahu Anthra. Moon is in the constellation of Kethu and sub of Mercury. Kethu has to give the results of planet with which it is conjoined, as it is a node. Saturn is lord of 2 to 5 and situated in 12 to 5. Hence Moon is definitely evil as it is in the constellation of the node representing the second house to the 5th and in the sub of lord of 7 to 5, situated in 2 to 5.

Jupiter is in the constellation of Saturn, lord of 2 in 12 to 5th house and sub of Venus, which is the occupant of 5 in the constellation of node in 12 to 5. Venus itself is evil to 5. Mars in Venus star and Venus sub is also evil. Rahu in Venus sign, Mars star and Mars sub is definitely evil. Hence, Moon Dasa Jupiter Bhukti Rahu Anthra was evil. Let us take pleasant functions

5.1.4 Marriage: Judge houses 2, 7 and 11 counted from lagna. 2, 7 and 11 are vacant. 2 is ruled by Sun. 11 is ruled by Mercury. 7 is owned by Saturn. Saturn and Kethu are in Mercury star. Jupiter is in Saturn's star. Kethu is stronger than lord of 7. Moon and Venus are in Kethu star. Sun is also strong as there is no planet in Sun's star.

Marriage took place during Venus Dasa Kethu Bhukti Venus Anthra Moon Shookshma on 6-7-1947 on Sravanam star day Venus is in Kethu star. Kethu is stronger than Saturn, lord of 7 (7th house vacant). Kethu is in the star of Mercury (lord of 1 and 11). Both houses vacant. Moon is in Kethu star. Kethu stronger than Saturn, lord of 7. Kethu has to predominantly indicate Saturn's result: then only that of Mars, Moon's star is not in Mars sign. Hence, Sravanam star governed by Moon is Saturn's sign gave marriage.

Normally when one finds Saturn and Kethu in 4, 9 & 11 house occupied by lord of 12, one following traditional Astrology must say that the native will have no tendency towards education. Also that he cannot come up nicely in studies. Not a word can be mentioned about marriage.

But according to Krishnamurti Padhdhati, Saturn and Kethu in 4 are in the constellation of Mercury, lord of 11 and sub of Mars, owner of 4 and 9 shows higher education.

According to Prof. Krishnamurti, if the dasanatha is connected with houses 4 and 9, they will give education. Venus', the constellation of node in 4, gave studies throughout Venus Dasa. Sun in the constellation of Moon in 9 gave higher studies. As Moon is also signifier of 12, Sun in the constellation of Moon, gave the break and ended his studies. He discontinued his studies after successfully completing Medical College course during Sun Dasa Saturn Bhukti Sun Anthra in December, 1952.

Exercise

1. Give the various factors to be kept in view while applying KP to Natal Horoscopes.
2. A query is given at 9.45 am at Delhi on 24.9.04 as to when marriage will occur. The girl was born in Delhi on 1.5.1982 at 12.30 pm (IST).

Chapter-6

Horary Astrology using Krishnamurthy Paddhati

6.1 Why is Horary Astrology preferred

To determine the events that are due to occur in ones life, there are basically two resources :-

1. Natal Astrology and
2. Horary Astrology.

The accuracy of the Natal horoscope, even today is of doubt as the time of birth itself is questionable. This leads to wrong predictions. Similarly to pinpoint the predictions of an event especially those in the near future, more articulation of the Natal Horoscope is called for. The Horary Astrology does come to the rescue especially where accurate Natal Horoscopes are not available. Horary Astrology can be of two mode.

1. Through horoscope cast at the time of query
2. Through any numerical number between 1&249 on a special query.

Examples for evaluation in the former mode is given below :

6.2 Krishnamurthy Padhati applied to Horary Astrology through Time of query

While applying Horary Astrology one must be confident of the Bhavas that enhance the signifiers for a particular query. In this connection one must also keep in mind the order of preference of signifiers as enumerated in chapter -3. The Bhava signifiers for some common functions are given in chapter 3 .

An illustration using the above mode would make it clear.

6.2.1 WHEN WILL THE TRUNK-CALL MATERIALISE?

Consider the houses 3, 9 and 11. Take the sub-lord of the 11th cusp and find out whether the lord of the constellation in which the sub-lord is deposited, is not retrograde. If it were to be retrograde, no purpose will be served by that call. If the lord of the constellation in which third cusp sub-lord is deposited is retrograde, the call will not materialise. If the sub-lord of the 9th cusp is retrograde, the other party cannot. be contacted. But if they are in direct motion find out the signifiers of the houses 3,9 and 11 as It will materialise.

Since the call is to materialise in minutes or in hours one need not work out dasa balance, one has to note only the movement of the ascendant and calculate when the

ascendant will come to the position in the zodiac which is governed by the ruling planets and also the significators of the houses 3, 9 and 11.

A planet which is the significator of 3 should also be the significators of 9 or 11. Similarly the significator of 9 also should be the significator of 3 or 11. The significator of 11 should be the significator of 3 or 9. Such of the significators alone must be taken. If a planet is not the significator of 9 and 11 but is the significator of 6 or 8 or 12, one can take it that, that particular planet is not the significator for this trunk-call, even though it is the significator of the third house. Similarly if a planet is the significator of the 9 and it is also the significator of 6 or 8 or 12, and is not the significator of 3 or 11, then the party in, the other end will be absent, only when significator of the 9th is also a significator or either 3 or 11, then alone he will answer the call. If a planet is the significator of the 11th house and not the significator of 3 or 9, but is the significator of other houses reject this planet. Select those planets which are the significator of the 11th house and also the significator of 3 or 9 or both.

On 2-9-69 a telephone trunk call to Kandy was booked at 9.00 A.M. As it was an urgent call and Kandy was about 10 miles away from Matale. I expected the trunk call within an hour or two if the line is in order. Before I could get the call I worked out the time of fructification of the call according to Krishnamurti Padhdhati.

Time of judgment : 9.00 A.M : 21-9-1969; 7°28'N; 80°22'E.

Lagna : 20-22', Ayanamsa used : 23° 20'

VI 19°55'	VII 20°22' Sa 14°48'	VIII 18°55'	IX 16°55'
V 17°55' Ra 27°55'			
IV 16°55' Mo 1°52'	9.00 A.M. 21.9.1969		XI 17°55' Ve 4°14' Ke 27°21'
■ 16°55' Mar 6°29'	II 18°55'	I 20°22'	XII 19°55' Su 4°38' Ju 19°1' Me 20°15'

Planets	Lord of Constellation	Lord of sub.
Sun	Sun	Saturn
Moon	Sun	Jupiter
Mars	Ketu	Rahu
Mercury (R)	Moon	Ketu
Jupiter	Moon	Mercury

Venus	Ketu	Moon
Saturn (R)	Venus	Venus
Rahu	Jupiter	Venus
Ketu	Sun	Moon

For the fructification of telephone trunk call, houses 3 and 11 have to be judged.

The third house is occupied by the Moon. Mercury and Jupiter occupy the star of Moon. Jupiter is the lord of 3rd.

Rahu is in Jupiter star. So the signifiers are Mercury, Jupiter and Rahu.

The eleventh house is occupied by Kethu, Sun and Jupiter. Mars and Venus are posited in the constellation ruled by Kethu. Moon, Sun and Kethu are in Sun's constellation. Rahu is in the star of Jupiter; So the signifiers are Mars, Venus, Moon, Sun and Rahu.

Now the signifiers that contribute to the fructification of the telephone trunk call are Mercury, Jupiter, Rahu, Mars, Venus, Moon and Sun.

The 3rd cusp is in the star of Kethu and sub of Moon.

The 11th cusp is in Venus star and Mars sub.

As the sub-lords of these cusps happen to be strong signifiers, the fructification of the call is assured.

In order to fix the signifiers which will rule the moment when the call materialises, take the ruling planets at the time of judgment:-

1. The day was Sunday whose ruler is Sun.
2. The star in which Moon was transiting at the time of booking was ruled by Sun.
3. The sign in which Moon was transiting was Makara, ruled by Saturn.
4. The rising at the time of booking was Thula, owned by Venus.
5. The rising star in which lagna falls was Jupiter.

So the ruling planets are Sun, Saturn, Venus and Jupiter.

The common ones found among the signifiers are Sun, Jupiter and Venus. These planets conjointly indicate the time of fructification of the trunk call, irrespective of whether it is a minor or major event. As the call will be realised within a few minutes or hours, the transit of the lagna is to be considered, So I calculated the position of Zodiac to rise in the East. It can be Venus sign, Jupiter star, Sun sub, Venus sub sub. So, as stated above, the rising lagna will be $29^{\circ} 20'$ Thula.

The correct time of fructification of trunk call was calculated taking Nirayana lagna as $29^{\circ} 20'$ Thula. The Ayanamsa adopted was $23^{\circ} 20'$. Sidereal time for the Moon at Metale on this date is 11 hr. 59 mts. 52 sec. When calculated, the result arrived at was 9.41 A.M. So I declared the trunk call will materialize at 9.41 A.M. only.

As predicted the telephone trunk call came through sharp at 9.41 A.M.

6.3 Krishnamurthy Padhathi applied to Horary Astrology through a query vide a number

A number is requested for between 1&249 and the ascendant is fined through the Ready Reference table given at Chapter -2. The cusps and planetary positions are accordingly worked out for the time of query. While analysing and evolving the significators the principles as mentioned in Chapter - 2 should continue to be applied.

An example will illustrate this application more clearly :

6.3.1 How Long will one live?

Ask for a number between 1 and 249: for that number fix the ascendant referring to the Table for Krishnamurti padhdhati.

If the ascendant is in a movable sign, 11th house is the badhakasthana, if the ascendant falls in a fixed sign, 9th house is the badhakasthana if the ascendant falls in a common sign, the 7th house is the badhakasthana.

Whatever be the sign in which the ascendant falls, the 2nd and the 7th houses are marakasthanas. Therefore one is to judge all these three houses and find out the significators.

One has to erect the map and note down the dasa balance to find out the date of death.

According to western system, the ascendant, the Moon and the Sun should not be forming evil aspects with the lord of 4,6,8 and 12, and at the same time the lord of the ascendant the Moon and the Sun must be strong. In that case, long life is promised. Jupiter and Venus ruling good houses and the lord of the ascendant forming good aspect with Moon or Sun promises long life. But if the ascendant, Moon and Sun are receiving bad aspects like square, opposition, conjunction etc., from the lord of 4, 6, 8 or 12, only short life is indicated. This is how the westerners proceed, they say that the ascendant, its lord and the Moon indicate the consultant's health and longevity. They add that lord of the ascendant retrograde or deposited in 8, or lord of 8 in one, or malefics occupying one and 8 will cause short life. To note for how many more years one would live, they calculate as follows: If the lord of the ascendant will from either conjunction or square or opposition with Sun or to the lord of 8, 6 or 4, calculate how many degrees he is away from that planet. Then calculate according to the rules given already.

Note the sub-lord of the ascendant. If he is deposited in the constellation of the significators of badhakasthana and marakasthana the life will be short after the time of judgment. It will not be for many years. If sub-lord of the ascendant were to be in the

constellation of the signifier of sixth house, the person will suffer from disease but will not succumb to it; but if the sub lord of the ascendant is deposited in the constellation of the signifier of the 8th house, he will meet with an accident. If the sub-lord of the ascendant in the Horary Chart is the signifier of the 12th house, he will be in bed for long period and may be admitted in a hospital. Death is indicated only by the signifiers of marakasthana and badhakasthana. According to the strength of the lord of the constellation in which the sub-lord of the ascendant is deposited, one is to fix the dasa and the sub-periods. Calculate from the horoscope erected for the number (Horary) and work out, after how many years and months, the conjoined period of the signifiers will operate.

Predict that he will live only for so many years and months. Never omit to confirm by taking the ruling planets at the moment of judgment.

Number 246 is given for judgment at 5-30 P.M. on 24-10-'67.

By 246 it is meant that Jupiter's sign Pisces, Mercury star Revathi and the sub of Mars is the Ascendant.

The sub-lord Mars is in the constellation of Kethu in the 7th house. Hence the death is inevitable and by transit when lord of 1, the ascendant conjoins the node in the 7th house, in that year, when Sun transit in Sun's star and Kethu sub and when Moon transits the constellation of Rahu or Guru or Kethu, the end will come.

Ruling planets : Day lord, Mars. Ascendant is in Aswini, Kethu star, sign is Aries, owned by Mars; Moon is in Arudhra star governed by Rahu and the lord of the sign where Moon is Mercury, hence the ruling planets are Rahu, Mars, Mercury and Kethu. Jupiter and Mars are in Kethu constellation. Since Mercury is in the sign and house, where Kethu is, take Kethu.

Therefore in the conjoined period of the ruling planets there is danger to his life.

Analysis:

For danger to life, we must consider the badhakasthana and the marakasthanas. As Pisces is lagna, it is a common sign. 7th house from this sign is badhakasthana. For common sign the 7th house is badhakasthana and marakasthana, and Kendhrasthana. So it is trebly evil to cause the death.

According to Krishnamurti Padhdhati, the following are the signifiers of death:

- (a) The planets posited in the constellation of the occupants of badhakasthana and marakasthana.
- (b) The planets occupying the above said houses.
- (c) The planets in the constellation of the lords of the above said badhaka and maraka houses.

(d) The lords of these houses.

(e) Those which are conjoined with the signifiers or aspected by them, thereby having connection with these matters.

Now let us analyse houses 2 and 7.

The second bhava is unoccupied by any planet. Mars is lord of 2. Rahu is in Aries, representing Mars. Rahu (a node) is therefore more strong to give the result. Select Rahu. Sun is in Rahu star.

The seventh bhava is occupied by Sun, Kethu and retrograde Mercury.

Mercury rules Ashlesha, Jyeshta, and Revathi. No planet is in any. Mercury (R) is in the constellation of Jupiter and in the sub of retrograde Saturn.

Sun is conjoined with Kethu. Kethu rules Aswini, Magha and Moola. Rahu, Mars and Jupiter are in the constellation of Kethu, Jupiter is in 6th sign and aspects both Mars and Rahu. Jupiter is also in sub Rahu, a signifier of death. Mars is represented by node Rahu. Kethu is also occupant of 7th bhava. Kethu is in the constellation of Mars (lord of 2) and in the sub of Venus (lord of 8), a strong signifier of death. Finally take Rahu, Kethu and Jupiter.

If we analyse dasa system, the native is running Rahu Dasa, Mercury Bhukti. (Balance 1 year and 26 days).

Thus we come to the conclusion that during Rahu Dasa Kethu Bhukti Rahu Anthra, Jupiter Shookshma there would be danger to the native's life.

4.3.2 Example 2

Query will the delivery of my child be normal or not ?

The number given within 249 on 2.7.1969, 7.30 PM IST (Lat. of Place : 18°55'N) at Bombay was 100. The ascendant at the time of query falls in 24.00 Leo in Venus constellation & Mercury sub. The chart is as follows:-

Sat (R) 14-05' Lagna 23° 20'	Rahu 4-19 II 25-25		Moon 13-39
	24-10-67 5-30 P.M.		
			Ven 21-24 Jup 7-31
Mars 7-44		Me(R)23-18 VIII 25-25' Sun 7-05 Ket 4-19'	VII 23-20

VIII 28.21 Rahu 1.37	Sat 13.34 IX 28.21	Ven 2.11 Mer 27.23 X 24.21	Sun 17.10 XI 24.21
VII 24.20	02-07-1969 7-30 P.M. IST 18.55N		XII 24.21
Moon 26.05 VI 24.21			Lagna 24.00
V 24.21	IV 24.21 Mars 8.35 (R)	III 23.21	II 23.21 Ketu 1.37 Jup 5.05

1. The Lagna Bhava is occupied by Ketu & Jupiter.
2. Owner of Lagna is posted in 10th
3. Mars aspects lord of Lagna by 8th aspect.

The owner of Lagna in 10th is well deposited and therefore no danger to the lady. 8th Aspect of Mars on Sun, Lord of Lagna and Ketu in Lagna Bhava are not favourable. It indicates that the lady would undergo Ceaserian birth as Mars indicates surgery. However delivery will be fruitful and with no danger to the lady's life as Jupiter is in Lagna Bhava. It may also be noted that though Mars is retrograde it is Mercury in the constellation of a Saturn which is in direct motion, thereby leading to use of surgical equipments but not for any control purpose.

What about ailment ?

Health is generally good if the sub-lord of the ascendant is deposited in the constellation of the planet occupying the house 1 or 11. But, if the sub-lord of the ascendant is deposited in the constellation of a planet which is the signifier of 1 and 6, one will suffer from disease during its periods and sub-periods. If the sub-lord of the 6th house is deposited in the constellation of a planet which is the signifier of the 6 and 1 and not of 11, then the sub-lord. During its sub-period, will give the disease.

If the sub-lord is deposited in a constellation, the lord of which is connected in any manner, with Saturn, the disease is a chronic one. Even, if the sub-lord is Saturn, the disease is a chronic one. But, if the sub-lord is in any manner connected with Mars, it is an acute disease. Mercury shows complications.

Cure When ?

Generally, one falls ill at the time when the conjoined period of the planets connected with the 6th and the first house in any manner operates; but, the cure comes only when the signifier of the 5th or 11th house follows the period governed by the disease producing 6th house signifier. One will survive from the disease after the cure, only when his longevity is promised, For longevity, one has to find out the Badhaka Sthana

and Maraka Sthana. These will give a clear picture).

As regards the nature of the disease, I have already published what each sign, star and sub indicates and said what it would be. Therefore, you have to refer to it and then ascertain which part of the body will be affected.

Accident

In Astrology, there is nothing as 'Accident'. Astrological dictionary does not have this word because, for every result, there is a cause. Therefore, even that which the people call as 'Accident' is something which happens when least expected. Anything that is a surprise and an unexpected one alone is classified as an accident, whether the result is favourable or unfavourable.

Therefore, the sub-lord of the 8th house is to be deposited in the constellation of the planet which is the signifier of the 8th house. If the signifier happens to be also the signifier of the 6th house, then he will have fever, etc., following the accident. If the same sub-lord is in the star of a planet who is also the signifier of the 12th, he will be admitted in a hospital. If the sub-lord happens to be the signifier of Bathaka Sthana, and Maraka Sthana ; he will succumb to it, provided his longevity is not further more promised. If the longevity is promised, he will get over this, and the condition of the patient would be threatening. Some may be unconscious; some may be given blood transfusion and also oxygen. Therefore we have to judge both the longevity and also the duration of the disease.

Exercise

1. What is Horary Astrology & its advantages.
2. What are the different modes of KP applied to Horary Astrology?
3. What are the important items to be kept in mind while answering a query by using K.P.
4. Using KP for a query at 9.00AM, 21.9.1969 7°28'N & 80°22"E as to whether a trunk all will materialize.
5. What is the numerical method adopted by KP for Horary Astrology. How is it applied?
6. Which are the bhavas that need to be studied for the longevity, education and prosperity of an individual?

Chapter - 7

Twelve Houses

7.1 WHAT THE TWELVE HOUSES SIGNIFY?

Lagna (First Bhava): Physical stature, colour, form and shape, constitution, health, vitality and vigour, habit of thinking, natural disposition and tendencies, personality and struggle for life, success or failure in attempts. Houses to be considered for specific functions

	Houses to be considered
1. Longevity	1, 8, 12
1. Self	2, 9, 4
2. Father	3, 9, 6, 10
3. Mother	2, 5, 10
4. Brother	
2. Property	
1. Purchase	4, 11, 12
2. Sale	3, 11, 5
3. Prosperity	
1. Self	1, 2, 11
2. Mother	1, 2, 5
3. Father	9, 10, 7
4. Communication	3, 9, 11
5. Interviews	3, 9, 11
6. Finance	
i. In service	2, 6, 10
ii. Gain in Lottery	6, 10, 11
7. Profession	
1. Competitive	2, 11, 6
2. Speculation	2, 5, 11
3. Promotion	2, 10, 11
4. Competition	6, 11, 2, 10
5. Nature of work changed	11, 12, 2
6. With change of place or not	3, 11, 2
7. Transfer	3, 10, 12
8. Marriage	
a. Prosperity	2, 7, 11
b. Break up	2, 6, 12
c. Rejoining	2, 7, 11
9. Children	
1. Birth	2, 5, 11
2. Prosperity	5, 9, 2
10. Overseas	
1. Permanent	3, 7, 9, 11
2. Temporary	3, 9, 11, 12
11. Education	
1. Within country	4, 11
2. Higher Studies	
a. Within country	8, 11
b. Outside Country	9, 11, 12

A note on Ayanamsa

To ascertain the exact position of the commencement of the Fixed Zodiac the points that are necessary to calculate are:

1. One should know when the fixed or Nirayana Zodiac and the Sayana Zodiac were in the same degree i.e. when both coincide.
2. The rate at which the moving Zodiac moves backward.
3. Which is the point to be taken as the first point of Aries according to Hindu method, i.e. Nirayana Zodiac.
1. The date of coincidence of both zodiacs: The following are the different opinions of the various scientists or astrologers.

Cheiro	388 B. C.	D. Davidson	317 B. C.
G. Massey	255 B. C.	Thierens	125 B. C.
P. Council	0 A. D.	C. Fagan	213 A. D.
Lahiri	285 A. D.	Krishnamurti	291 A. D.
P. S. Ray	319 A. D.	Sepharia	498 A. D.

2. The rate at which the point of intersection of the Ecliptic and the celestial quator moves in retrograde motion is as follows and there too, there is no agreement.

Aryabhata	46.3"	Parasara	46.5"
Varabamihira	50.0"	K.P. follows Newcomb	50.2388475
Surya Siddhanta	54.0"	Bhaskara	59.9"

3. Some astronomers take aswini group of stars as the starting point but it is difficult to fix a point when it is a group of stars. Others take a point which is 180° from the one bright star SPICA which is taken as the guide to locate the area of the constellation Chitra: It is the 14th star of the 27 stars making up the Zodiac, each extending to 13 degrees 20 minutes. Spica is taken to be at the end of Virgo and at the commencement of Libra; hence it is taken to be at the sixth degree and 40 minutes from the commencement of the asterism Chitra. Spica is considered to be exactly in the autumnal equinox on the fixed Zodiac.

With the variation so vast in fixing ayanamsa, difference between K.P, Lahiri and C.G. Rajan is negligible and any one can be taken for all astrological purposes. Lahiri ayanamsa or so called Chitrapakha ayanamsa is widely accepted. However, followers of KP System like to use KP ayanamsa only.
